

# Notre Dame

## Sixth Form

A Level Exam Board OCR H432

# Chemistry

### If you have >>

5 GCSE passes at grade 4 and above AND have studied the sciences at GCSE level and have achieved 2 grade 6 passes in either GCSE Separate Sciences or GCSE Trilogy Science. You must have a grade 5 in Maths at GCSE.

### You can >>

apply to enrol on the 'A' Level Chemistry course.

### This will mean >>

you will have the opportunity to develop a wide range of valuable key skills. You will be able to develop essential knowledge and understanding of the concepts of Chemistry and how chemists use these to produce useful materials. You will develop an understanding of the link between theory and experiment, and will be aware of how advances in instrumentation and IT are used in Chemistry.

### This course will appeal to any student who >>

is inquisitive about the contributions of Chemistry to society and the responsible use of scientific knowledge and evidence. The course is designed to sustain and develop your enjoyment and interest in Chemistry.

### You will >>

study four modules for AS level Chemistry, or six modules for A level Chemistry. Practical work will be an important part of the course and practical skills will be assessed in the examination papers. There will be an additional endorsement of practical skills as part of A level Chemistry.

### Course Modules are >>

- >> Module 1: Development of practical skills
- >> Module 2: Foundations in Chemistry
- >> Module 3: Periodic table & energy
- >> Module 4: Core organic Chemistry
- >> Module 5: Physical Chemistry and transition elements
- >> Module 6: Organic Chemistry and analysis
- >> Practical endorsement (A level only)
